Vernacare Surgical Solutions. Designed for professionals.

Precision Performance Protection

Delivering quality surgical, woundcare, and infection prevention solutions to healthcare professionals across the globe.

Vernacare is home to a wide range of trusted healthcare brands offering a full portfolio of Surgical Solutions, with thousands of daily users. Continuous innovation into our product design, manufacturing capabilities and sustainable, reliable production methods have ensured our brands have become a trusted choice amongst healthcare professionals.

Our Surgical brands offer a wide range of individual instruments, procedure based instrument packs, laparoscopic retrieval bags, Women's Health instruments and specialist woundcare.

Precision Performance Protection

The precision you need, the performance you want, the protection you deserve.

The Instrapac® range of single-use instruments has been revolutionary in the healthcare industry. The brand launched in 2002 and has been a pioneer in the introduction of single-use instruments. The full range features specialist instruments for Podiatry, Dental, and Women's Health procedures.

Developing innovative solutions and providing alternatives to reusable instruments are the core of the brand's values. Instrapac® instruments are used throughout healthcare facilities and have become an essential part of everyday procedures.

Instrapac® single-use instruments are cost-effective, time-efficient and help minimise cross-infection within healthcare facilities:

Cost Savings: Single-use instruments help reveal hidden costs associated with the reprocessing and maintenance of reusables. Eliminating the need for cleaning, sterilisation, and reprocessing ensures that savings are made on additional expenses.¹

Time Saving: The use of single-use instruments streamlines the process between procedures by removing unnecessary cleaning and reprocessing, saving valuable time maximising patient contact time, and improving overall efficiency.

Improved Infection Control: Single-use instruments can reduce the risk of cross-infection, which can have major implications. Using a new, sterile instrument for each procedure, reduces the risk of transmitting infections for both healthcare providers and patients.²

Why choose Instrapac®?

- Industry leader in single-use instruments for over 20 years
- High quality instruments made from medical grade materials
- Full compliance with Medical Device Directive
- Fully certified UK manufacturing facility
- Reliable stock, supply and delivery
- Independently certified by our Notified Body

Instrapac® is the first choice for podiatry practitioners. Our extensive range features Nail Cutters, Podiatry Procedure Packs, instruments for Nail Surgery, Podiatry Burs and a wide selection of supplementary items to support podiatrists to deliver the highest levels of care.

INTRODUCING INSTRAPAC®

Nail Cutters

The Instrapac® range of Nail Cutters comprises a range of sizes to facilitate excellent dexterity and user comfort when cutting normal or thickened toenails. The range has a selection of standard, small and fine curved blades, alongside a standard straight blade option, for optimum precision cutting. Manufactured from medical grade stainless steel, supplied in easy to open, individual sterile packaging.

INTRODUCING INSTRAPAC®

Burs Range

The Instrapac® range of Podiatry Burs benefit from precision design and manufacturing and feature a high performance diamond grit finish. They deliver a consistent abrasive action throughout the procedure, for quick and effective removal of hardened skin or thinning of thickened nails.

Our Burs range offers Podiatrists the correct product for all types of procedures including Bud, Pear, Barrel and Tapered Bur designs and all feature a bur shank diameter of 2.35mm to fit all proprietary power tools used by Podiatrists.

Instrapac® Podiatry Burs Range

The Instrapac® range of Podiatry Burs offer Podiatrists a much greater choice of products for all podiatry procedures. All of the burs benefit from precision design and manufacturing and feature a high performance diamond grit finish.

Designed to deliver consistent abrasive action throughout the procedure, for quick and effective removal of hardened skin or thinning of thickened nails.

The range includes Bud, Pear, Barrel, and Tapered Bur designs which all feature a bur shank diameter of 2.35mm to fit all proprietary power tools used by Podiatrists:

- Wide range to cater for all bur requirements and applications
- High quality diamond grit finish for consistent abrasive action throughout the procedure
- Designs and sizes specifically for thickened nails or hard, calloused skin

INTRODUCING COMFI™

Dressings

Vernacare has been working with the NHS for over 50 years and we've been the brand leader in tubular bandages since 2013. Our Comfi™ Range offers a selection of high-quality tubular bandages and garments, developed by a team of woundcare experts.

ComfiNETTE™, ComfiTUBE™ and ComfiGAUZ™ Tubular Bandages

ComfiNETTE™, ComfiTUBE™ and ComfiGAUZ™ are a range of single-use cost-effective tubular bandages for dressing retention. The range is available in a variety of widths and lengths to fit all areas of the body, ranging from fingers and toes to an adult torso.

MATERIAL:

ComfiNETTE™ is made from **100% viscose**, ideal for frequent dressing changes.

ComfiTUBE™ is made from **100% unbleached cotton**, containing natural oils making the bandage water repellent.

ComfiGAUZ™ is made from **100% bleached cotton**, ideal for use where natural fibres are preferred.

PRODUCT OVERVIEW:

-  Simple, safe and easy-to-use
-  Light & breathable fabric
-  Variety of widths and lengths
-  Cost effective

Application	ComfiNETTE™ 20m		ComfiTUBE™ 20m		ComfiGAUZ™ 20m

Skintact

Skintact is a high quality, sterile, perforated film absorbent dressing that is used as a low adherent wound contact layer. The dressing is the same on both sides, which prevents it being used ‘wrong side down’. It consists of two layers of perforated film with an inner absorbent layer. The perforations allow drainage of exudate to the absorbent layer where fluid is wicked laterally, extending the time before strike through occurs.

Skintact is suitable for the management of minor wounds, cuts and grazes and is ideal for use in chiropody thanks to the two low adherent sides, for use between toes. Dressings are supplied in individual sterile packs in a choice of three sizes, packed in dispensing boxes of 100.

- Low adherent wound dressing, easily removed without trauma
- The same on both sides – hence suitable for patient own use as it cannot be applied ‘wrong side down’
- Superior wicking spreads fluid laterally and reduces dressing change frequency
- Pads, cushions and protects healing wounds
- Supplied in individual sterile packs and dispensing boxes

Skintact Packaging – Dispensing Box

Product Code	PIP Code	Size	Quantity Per Sales UOM
7900	095-2986	5 x 5cm	600 dressings (100's x 6)
7901	095-2994	10 x 10cm	600 dressings (100's x 6)
7902	095-3000	10 x 20cm	600 dressings (100's x 6)

Icon Explanation

-  Indicates a product meets the essential requirements of all relevant European directives and/or regulation
-  Product is single-use only
-  **STERILE**

Product is supplied sterile
-  **NON STERILE**

Product is supplied non-sterile
-  **DT**

Product is listed on the Drug Tariff

All product dimensions are indicative only.
Contents of the Procedure Packs are CE marked where appropriate.
